

TERMATE

VACANCY

Technical Engineer – CAD/CAM/CNC

Termate is known worldwide as a leader in the design, manufacture and application of busbar supports, and has been established for over 60 years. We are firmly committed to investing in our people and in new plant and equipment as our customer expectations and technical requirements change. As a result, we now have an opportunity for a Technical Engineer – CAD/CAM/CNC to join our team to aid the development of our recently implemented plastic CNC machining services.

The job will primarily be to act as the interface between our Customers and the production area, interpreting and agreeing Customer requirements and then translating this into successful production parts. You will take the sketches or drawings from our Customers and, in consultation with them, produce working CAD models following through to issuing CAM data to the CNC cell and managing this process in conjunction with our production controller.

To succeed in this role, you will need to be proficient in 3D CAD modelling (Fusion 360 preferred) and have experience of direct Customer facing technical discussions. Whilst experience of translating 3D models into CAM programmes would be an advantage full training in this aspect can be given.

We are looking for enthusiastic staff who can demonstrate an ability to operate under their own initiative with a high level of attention to detail.

This is a full time, permanent position. Hours of work are 37.5 hours per week with a 30-minute lunch break. We offer a competitive salary together with profit related bonus and 20 days' holiday (plus statutory days). Our site is in New Basford with regular tram and bus links.

To apply, please send your CV and a full covering letter to applications@encompass-group.co.uk
